

Geometrics has supplied the world with rugged, portable, easy-to-use, and technologically-innovative [geophysical instruments](#) — and responsive, worldwide [customer support](#), since 1969.

Al Bayan Technical Equipment L.L.C are one of the leading distributors of Geometrics products in GCC.

Our line of [seismographs](#), [magnetometers](#), and [geolectrical](#) instruments enables subsurface imaging for the following applications:

- Mineral, oil, and gas exploration
- Geohazard studies
- Fault investigations
- Rippability and depth to bedrock
- Unexploded ordnance mapping
- Geotechnical engineering studies
- Archaeology

Seismographs, Magnetometers and Geoelectrical Instruments for Your Survey

Geometrics leads the world in providing top-quality, highly-portable geophysical instruments for researchers and universities, exploration companies, geotechnical companies, and government agencies. Leverage our 45 years of designing and making innovative products to make the most of your next survey.

Al Bayan Technical Equipment LLC,
