

Global Geotech is a leading manufacturer and supplier of exploration drilling and sampling equipment. We supply customers throughout the world with high quality earth drilling, boring, core sampling and in-situ ground testing equipment.

Our product range includes tools for obtaining geological samples in a wide range of formations from the softest soils to the hardest rocks. We also supply equipment for in-situ testing of boreholes, and for the installation of monitoring wells.

We focus our efforts on offering tools and accessories which help the user maximize productivity and minimize costs. Our experienced engineers and technical staff are always happy to advise and deal with any enquiries that you may have.

Al Bayan Technical Equipment L.L.C are the sole distributors of Global Geotech in GCC.
